Streamline Shipping Workflows with OnShip Station

OnShip Station, powered by OnShip Elite, is an All-In-One 3D Dimensioner, 70 lb. scale & shipping label printer. Quickly measures parcels, captures weights & prints shipping labels

E-Commerce Shipping Platform

OnShip Elite is an intuitive, yet powerful online shipping platform designed with e-Commerce shippers in mind. Easily import, manage, and ship your online orders from multiple storefronts under one roof with access to discounted USPS, UPS, and FedEx rates, ensuring you get the best rate every time.

With access to unlimited shipments and users, this scalable solution enables businesses to grow while ensuring they have the tools needed, regardless of complexity or size.

HOW IT WORKS

## The fastest, easiest way to Ship products to your customers.

1. Import Orders - Create Orders

Import orders from 100+ selling channels, marketplaces, ERPs, CRMs, or IMSs with shipping configurations automatically applied.

2. Manage Shipping -

Create custom branded packing slips and use our scan-based workflows, bulk update your orders, and use automation processes to quickly fulfill your day's shipments.
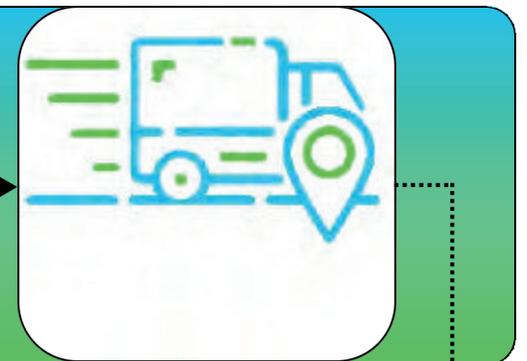

3. Print Discounted Shipping Labels

We provide access to shipping discounts of up to 88% & you can compare rates from carrier negotiated rates then print labels individually or in batches. Use rules to create batches and set rating.
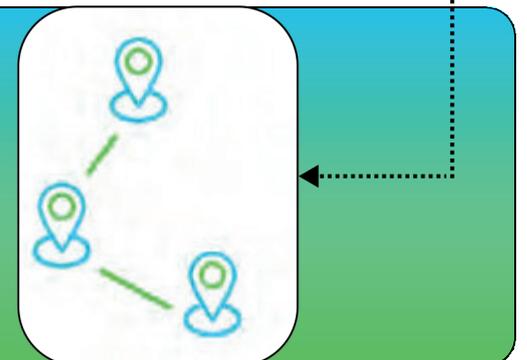

4. Instantly Update Tracking

OnShip Elite instantly updates tracking information to the selling channel and the customer once an order ships.
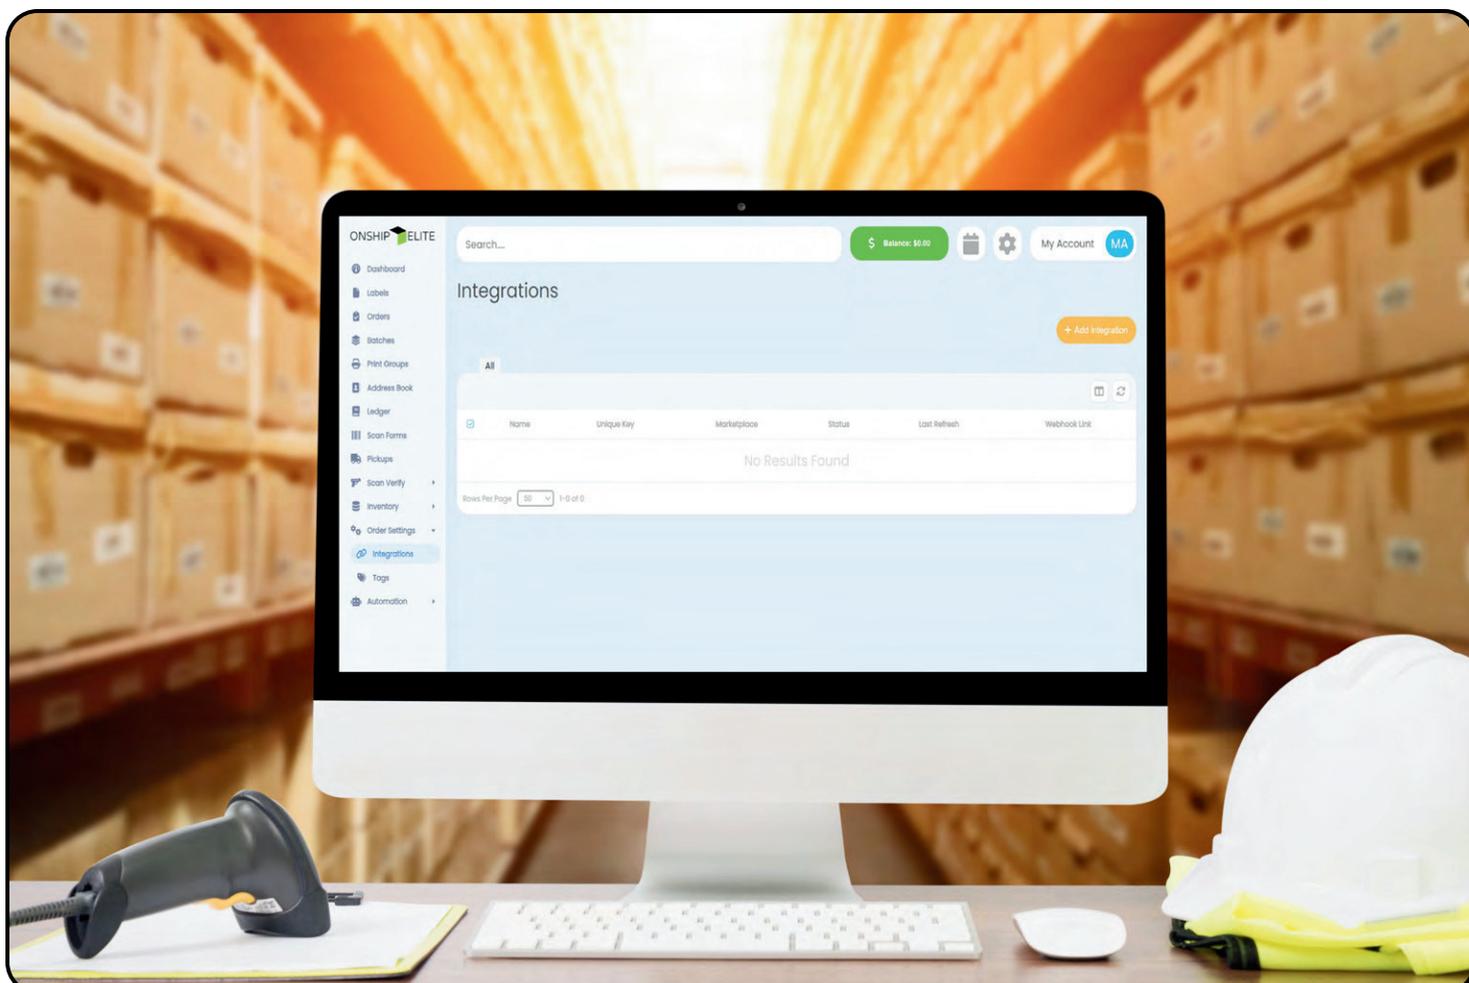

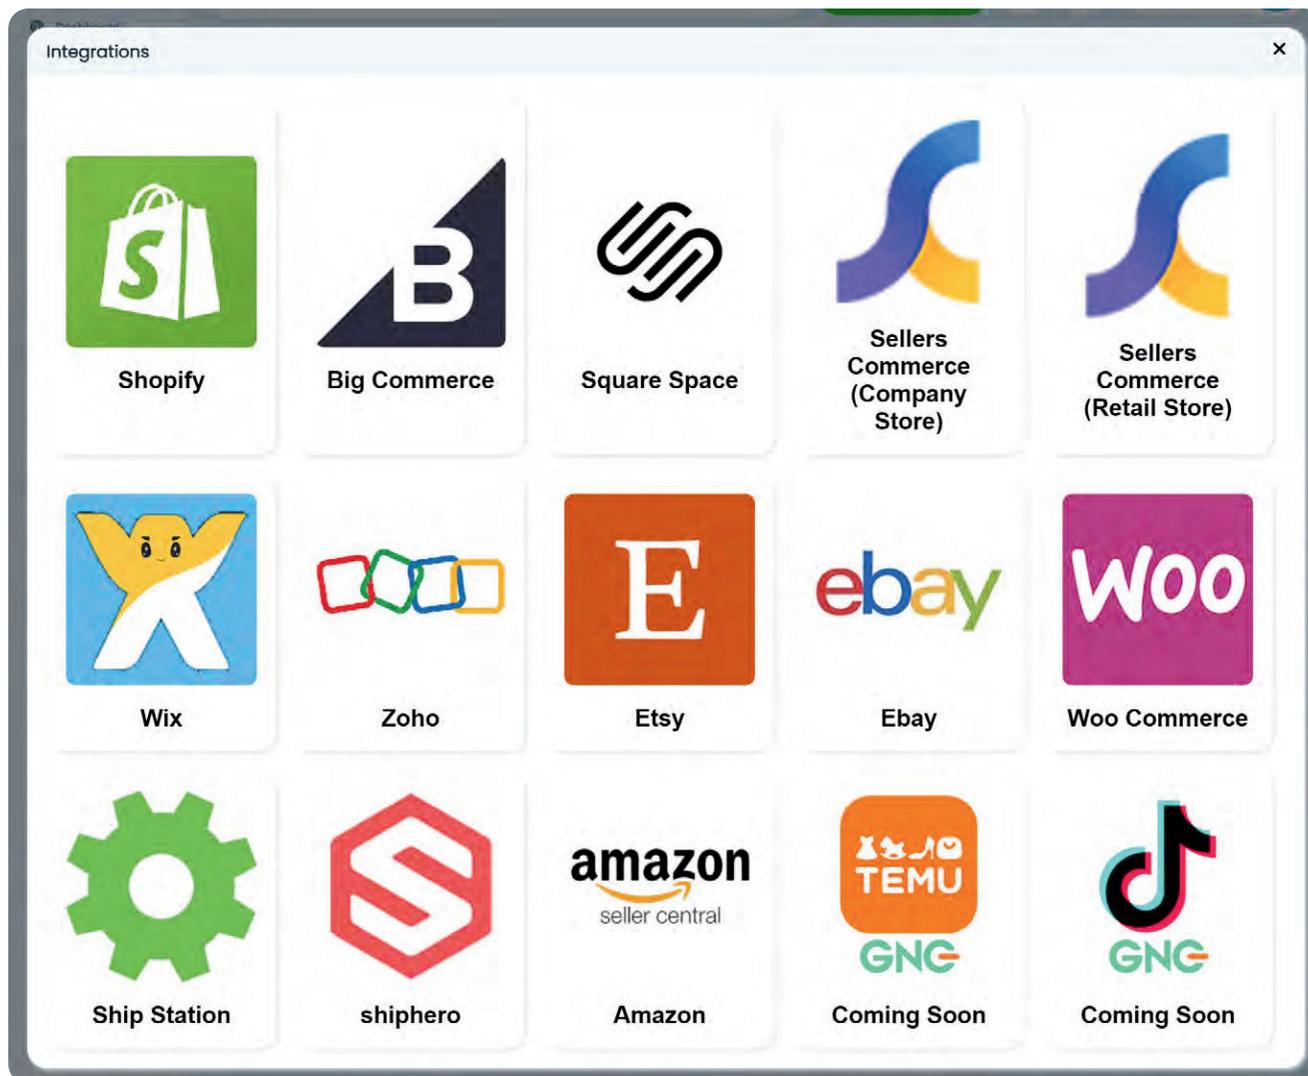

5. Watch for Trends

Never miss out on how your carriers are performing and where all shipments are at in transit. "Watch" is the smart way to stay informed about the status of your shipment.

E-Commerce Focused
Order Importing & Integrations

Order Importing and Integrations make shipping your online orders a breeze. Easily Import orders from an ERP system or integrate to any of the below e-Commerce platforms in a few simple clicks of the mouse.

Integrations window showing platform options: Shopify, Big Commerce, Square Space, Sellers Commerce (Company Store), Sellers Commerce (Retail Store), Wix, Zoho, Etsy, Ebay, Woo Commerce, Ship Station, shiphero, Amazon, Coming Soon, Coming Soon

Integration

Easily connect your e-Commerce store allowing users to import & ship online orders

Multi-Carrier

Access to discounted USPS, UPS, and FedEx rates with the added ability to connect your own account
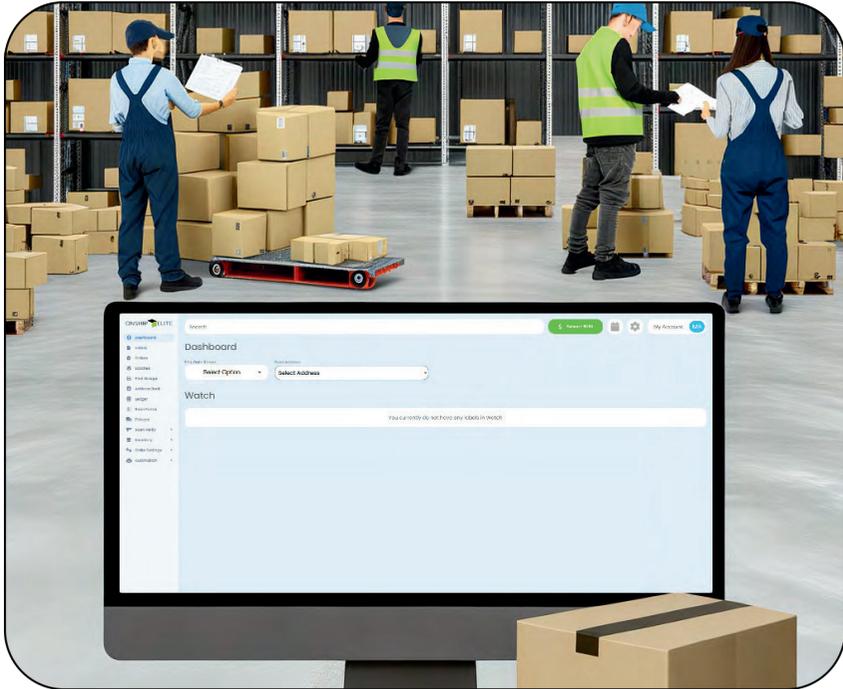

Automation

Eliminate wasted time by creating automated shipping rules for specific items, packages, or service options

Order Management

Create and manage inventory through the use of SKUs, branches, queues, and locations

Key Features

OnShip Elite offers a large list of standard features with great scalability as your company or online eCommerce grows. Import your orders or use Onship Elite's API to get low carrier negotiated rates.

Unlimited Users & Shipments

There is no limit to the number of packages you can ship daily. OnShip Elite allows your business shipping needs to grow without placing restrictions on the number packages sent daily, weekly, or monthly. Onship Elite offers an unlimited number of users to meet the needs of your business.

Multiple Shipping Sites

OnShip Elite offers the ability to create multiple "Ship From" addresses. There is no limit to how many locations you can set up. Login in anywhere and select the ship from address to see accurate rating information.

Address Book & Address Correction

Import your customer address book or enter client info on the fly. OnShip Elite's address correction software makes sure your address information is correct to ensure your package gets delivered ontime.

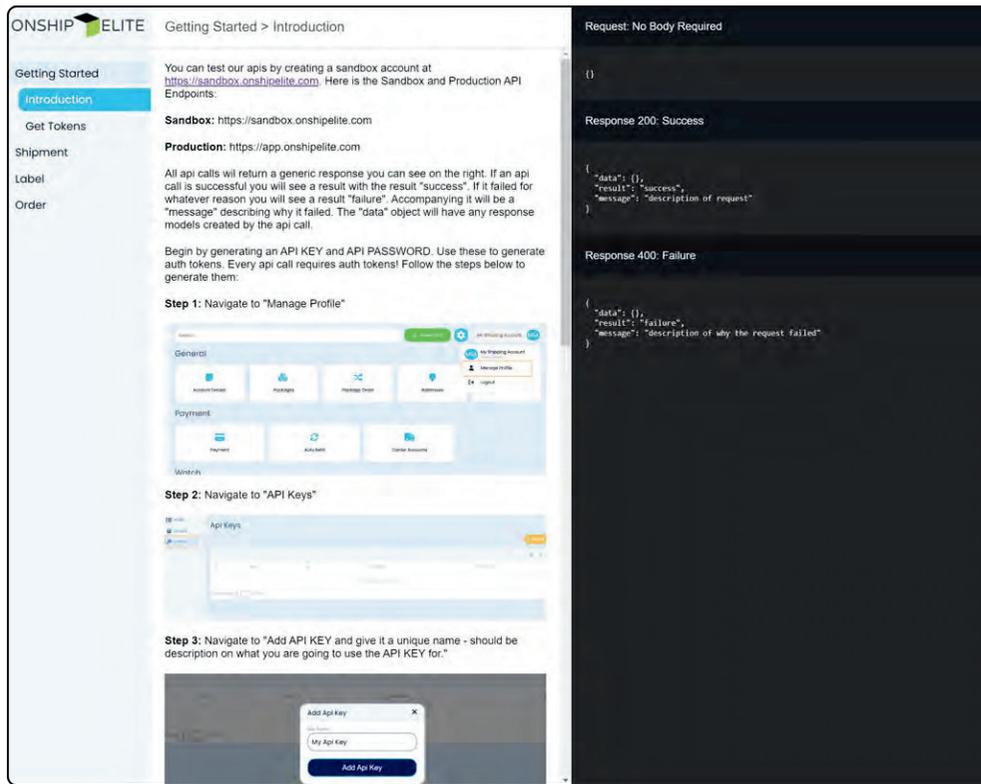

Create Custom Branded Packing List

Create your company branded packing list that includes your picture logo and business contact information. Custom Company Address and message customizations make your business stand out.

Create USPS First Class Postage Stamps

Print First Class Postage instead of using standard store bought stamps. This not only saves Time but allows you to pay for the exact amount of postage saving you money. Printing Postage from OnShip Elite turns the platform into an "E-Meter".

Carrier Rate Marketplace

Rate shop all carriers and purchase labels in one convenient place. Shop our carrier negotiated rates against your company carrier negotiated rates and choose the lowest option. If you choose our rates you will be billed thru the digital wallet, if you choose your company carrier rates you will be billed by your carrier directly.

Simple Pre-Paid Digital Wallet

Purchase all your carrier labels from one online software - Onship Elite offers a Digital wallet that allows you to pay in one convenient online digital wallet that can be funded either with ACH bank account or Credit Card.

Print all Shipping Labels in One Place

Don't flip between multiple shipper accounts to compare rates and delivery dates. You can rate and print shipping labels for USPS, UPS, and Fed-EX rates all from one login and pay from one digital wallet. OnShip Elite offers one convenient online gateway to all your shipping needs.

Email Send Notification

Inform your customers with a package sent email notification that can be customized with customers branding. Onship Elite sends an email to notify customer package is on its way and provide tracking and order information.

OnShip Elite API and Sandbox Platform

OnShip Elite is equipped with a fully documented API and a fully functional sandbox area for testing. You can talk directly to the OnShip Elite API to send and receive your data eliminating the possiblity of error thru data entry. The Sandbox area that runs and looks like the live product to test your code.

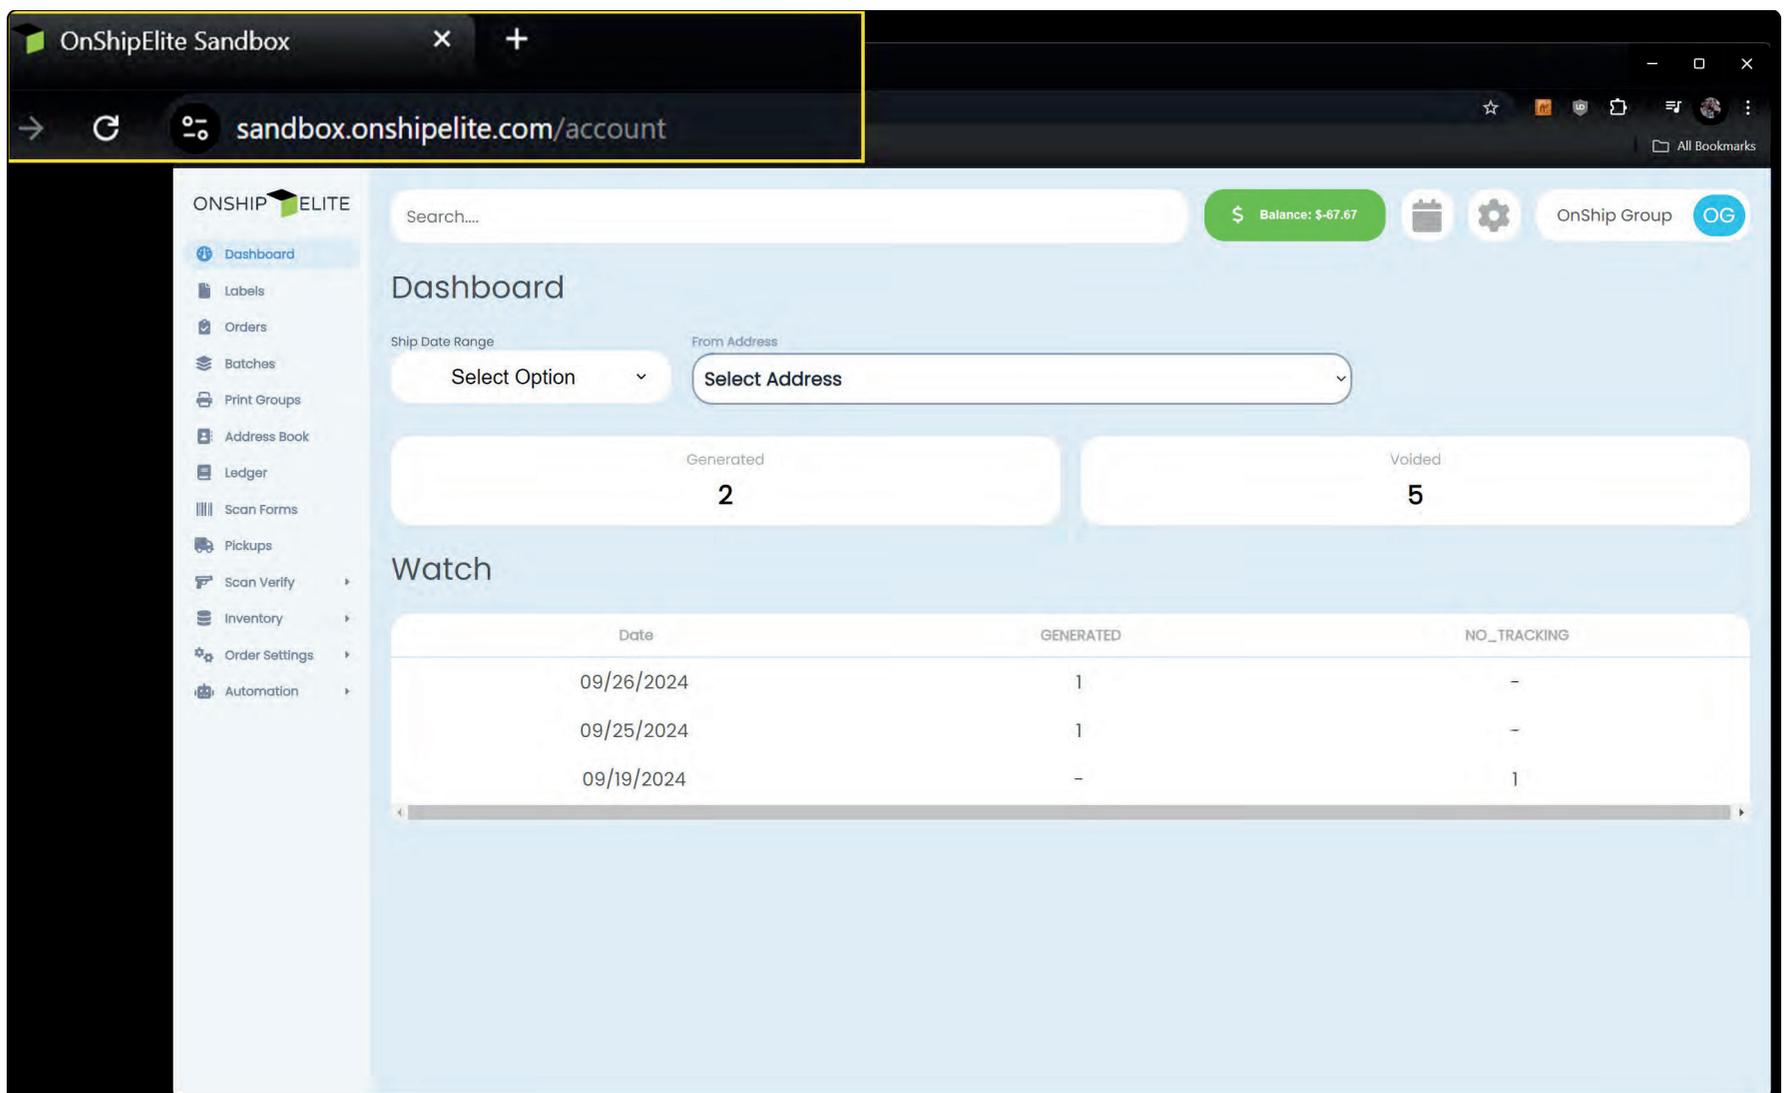

Fully Documented API

OnShip Elite's API is fully documented with screen examples. You can add shipment details to get a rating, create orders to generate packing lists, check on tracking info and much more. The documented API shows request examples and expected success responses. Check out the API documents at https://app.onshipelite.com/apidocs/order/add

Fully Functional Sandbox Accounts

OnShip Elite has a sandbox area for testing so you can test before going live. The sandbox area looks and functions just like the live product. The sandbox area can be used for training employees because it looks and functions like the real product.
